Continuation Sheet (PTOL-303)

Continuation of 3. NOTE: The limitation "to transmit signals to control activation of the first set of field replaceable units based upon signals received from the second set of replaceable units" in claim 16 and the limitations "two or more temperature sensors" and "two or more fan trays" in claim 16 raises new issues that would require further consideration and/or search. Further, applicant's argument that Barenys does not disclose "a communication link to transmit signals received from a central management agent indicating a failure of one or more of a first set of field replaceable units" is not persuasive because Bareny's discloses a communication link indicating a failure of one or more field replaceable units(Column 3, Lines 57-62; Column 7, Lines 49-52).
